Fees

At Juno Specialists, we believe in full disclosure and upfront information to help you navigate your medical care, financially.

Please note we are a privately billing facility only. All fees must be paid in full, on the day of consultation.

Fee structures are determined by individual practitioners and are outlined below for clarity.

We endeavour to keep up to date with estimating your out-of-pocket costs, but unfortunately cannot guarantee the exact rebate, as this is determined by Medicare, independent of Juno.

Extended Medicare Safety Net

We recommend all patients register for the 'Extended Medicare Safety Net' which allows patients to receive up to 85% of a private fee back once the threshold has been met, for consultations that qualify for a Medicare rebate.

If you have had multiple medical appointments, fertility treatment or private obstetric fees within the calendar year, you may well have met the threshold.

More Information can be found at

<https://www.servicesaustralia.gov.au/extended-medicare-safety-net?context=22001>

For Parent/ Baby appointments

Fees listed are total for appointments (not per patient).

Both mother and baby's medical needs are assessed and if this occurs, both individuals qualify for a Medicare rebate, reducing your out-of-pocket costs.

Medicare may not have issued your baby their Medicare number prior to your appointment. In this scenario, we take full payment on the day and will issue you a paid invoice which can be lodged by yourself later. Once lodged by yourself, you will then be issued the rebate by Medicare.
